

1. Record Nr.	UNINA9910633913303321
Titolo	Unilateral biportal endoscopy of the spine : an atlas of surgical techniques // edited by Javier Quillo-Olvera [and three others]
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2023] ©2023
ISBN	3-031-14736-7
Descrizione fisica	1 online resource (643 pages)
Disciplina	617.56
Soggetti	Spine - Instability
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Foreword -- Foreword -- Preface -- Preface -- Acknowledgments -- Contents -- Part I: Generalities -- Chapter 1: The Unilateral Biportal Endoscopic Spine Surgery Concept: An Overview -- Introduction -- An Overview of the UBE Technique -- Generalities of UBE -- Conclusion -- References -- Chapter 2: Brief History Review of Unilateral Biportal Spinal Endoscopy -- Introduction -- Important Milestones for the Development of UBE -- Discussion -- Conclusion -- References -- Chapter 3: Unilateral Biportal Endoscopic Spinal Surgery Evidence-Based Outcome -- Introduction -- Laminectomy for Spinal Stenosis and Disc Herniation -- Clinical Outcomes -- Learning Curve -- Operative Time, Opioid Use, and Hospital Stay -- Dural Expansion, Facet Preservation, and Secondary Instability -- Muscle Damage -- Safety -- Complications -- Lumbar Spinal Interbody Fusion -- Clinical Outcomes -- Compared with Minimally Invasive TLIF or PLIF -- Fusion Rate -- Complications -- Learning Curve -- Lumbar Foraminal Stenosis -- Extraforaminal Decompression at Lumbosacral Lesion -- Cervical Foraminotomy -- Cervical Spinal Stenosis -- Conclusion -- References -- Chapter 4: Current Technology Available for Unilateral Biportal Endoscopic Spinal Surgery -- Introduction -- Brief Summary of UBE in the Market -- Technology for UBE -- Arthroscopic Lenses -- Arthroscopy Sheath -- Light Sources -- Cameras -- Advanced Imaging Platforms Available for UBE -- Radiofrequency -- High-Speed Drill, Shaver, and Burrs -- Water Pumps -- Intraoperative Navigation-

Assisted UBE -- Other Technologies -- Conclusion -- References --
Part II: Basic Principles -- Chapter 5: Basic Principles of Unilateral
Biportal Endoscopic Spinal Surgery: Operative Room Setup, Anesthesia,
and Patient Positioning -- Introduction -- Operative Room Setup --
Operating Table -- Lighting Equipment -- Anesthesiology Machine.
Intraoperative Fluoroscopy -- Endoscopy Tower -- Anesthesia --
Patient Positioning -- Surgical Area Preparation -- Surgical Instruments
-- Discussion -- Conclusion -- References -- Chapter 6: Basic
Principles of Unilateral Biportal Endoscopic Spinal Surgery: Technical
Considerations Before Starting -- Introduction -- Organization
of the Working Space in the Surgery Room -- Patient Positioning --
Fluid Irrigation -- Radiological Landmarks for Access -- Discussion --
Conclusion -- References -- Chapter 7: Basic Principles of Unilateral
Biportal Endoscopic Spinal Surgery: Anatomical Considerations
of Elementary Approaches -- Introduction -- Unilateral Biportal
Endoscopic Cervical Approaches -- Deep Cervical Muscles -- Bony
Elements -- Ligamentum Flavum -- The Epidural Space Through
Biportal Endoscopy -- Peridural Membrane -- Meningovertebral
Ligaments -- Vascular Supply and Drainage of Epidural Space -- UBE-
Paramedian Lumbar Approach -- Overview -- Tips for a Left-Sided
Paramedian Approach -- Tips for a Right-Sided Paramedian Approach
-- UBE-Paraspinal Lumbar Approach -- Overview -- Conclusion --
References -- Chapter 8: Basic Principles of Unilateral Biportal
Endoscopic Surgery: Intraoperative Radiation Exposure During UBE
Procedures -- Introduction -- Strategies for Intraoperative Radiation
Protection During UBE Procedures -- Use Wearable Radiation Protective
Equipment -- Use Non-wearable Shields -- Maximize the Distance --
Use the "Hands-Off" Technique -- Setup with the X-Ray Tube
on the Bottom -- Stand on the Side of the Transmitted Beam -- Reduce
Fluoroscopic Dose -- Wear Dosimeters -- Tricks to Avoid Unintended
Radiation Exposure -- Make a Reasonable Preoperative Planning --
Obtain "Standard" AP and Lateral of Radiographic Views of the Target
Segment -- Make a Careful Body Surface Marking -- Make a Good
Exposure of the Interlaminar Window.
Future Directions for Intraoperative Radiation Reduction in UBE
Procedures -- Add Skin Markers to Preoperative Imaging Studies -- 3D
Computed Tomography Navigation or Robotic Guidance -- Surgical
Instruments -- Ultrasound Guidance -- Conclusion -- References --
Part III: The Learning Process -- Chapter 9: The Learning Process
of the Unilateral Biportal Endoscopic Spine Surgery: What Does
the Surgeon Need to Perform the Technique? -- Introduction --
Anatomical Knowledge of the Spine -- Radiological Spinal Anatomy
Understanding -- Palpation of the Surgical Target -- Endoscopic
Visualization of the Target Emphasizes the Paramedian Approach --
Discussion -- Conclusion -- References -- Chapter 10: How
to Go Further with My Clinical Practice on Unilateral Biportal Endoscopy
-- Introduction -- Do We Need to Upgrade to Endoscopic Spine? --
What Is the EBM That Supported UBE and Its Clinical Applications? --
How to Overcome the Obstacles? -- Our 12 Steps to Start UBE --
Conclusion -- References -- Chapter 11: From Conventional to Biportal
Endoscopic Surgery: The Transition Observed by an Expert Surgeon --
Introduction -- Considerations of Endoscopic Technique -- Technical
Characteristic of Open Techniques -- Technical Characteristic
of Endoscopic Techniques -- Broadening of the Indications
of Endoscopic Techniques -- Lumbar Spinal Stenosis -- Lumbar
Interbody Fusion -- Discussion -- Future Perspective -- Conclusion --
References -- Chapter 12: Put It into Practice: The Unilateral Biportal
Endoscopic Surgery -- Introduction -- Innovation of Lumbar

Endoscopic Access -- Transition to Biportal Endoscopic Access -- Preoperative Preparation -- Surgical Indications and Endpoints -- Surgical Preoperative Planning -- Operating Room Setup -- Surgical Instruments -- Surgical Technique -- Fluoroscopic Landmarks -- Creating the Working Space.

Gaining Access to the Spinal Canal -- Discectomy/Sequestrectomy -- Postoperative Management -- Evaluating Symptom Resolution -- Discussion -- Why Do UBE Lumbar Surgery Instead of Open Lumbar Surgery? -- Comparison of UBE and Full Endoscopy of the Spine -- Conclusion -- References -- Part IV: Lumbar -- Chapter 13: Unilateral Biportal Endoscopy for Non-migrated Lumbar Disc Herniation -- Introduction -- Indications -- Limitations -- Equipment -- Surgical Procedure -- Paramedian Approach -- Illustrated Cases -- Paraspinal Approach -- Illustrated Case -- Advantages -- Complications and Avoidance -- Conclusion -- References -- Chapter 14: Unilateral Biportal Endoscopy for Complex Lumbar Disc Herniations -- Introduction -- Preoperative Planning -- Sagittal Migration -- Axial Location -- Size and Consistency -- Level -- Surgical Technique -- Anesthesia and Position -- Surgical Steps -- Skin Marking -- Making Working Space and Triangulation -- Discectomy -- Close and End the Procedure -- Illustrated Cases -- Discussion -- How to Avoid Complications -- Dural Tear -- Bleeding and Epidural Hematoma -- Residual Fragment -- Conclusions -- References -- Chapter 15: Unilateral Biportal Endoscopy for Rostrally and Caudally Migrated Lumbar Disc Herniations -- Introduction -- Generalities -- Unilateral Biportal Endoscopic Approaches for Migrated Lumbar Disc Herniations -- Indications -- Illustrated Cases -- Discussion -- Conclusion -- References -- Chapter 16: Unilateral Laminotomy for Bilateral Decompression (ULBD) Through Biportal Endoscopy for Lumbar Spinal Stenosis -- Introduction -- Rationale -- Surgical Procedure -- Incision Planning and Portal Building -- Ipsilateral Decompression -- Contralateral Decompression -- Surgical Anatomy of Ligamentum Flavum Applied to Biportal Endoscopy -- Illustrated Cases -- Discussion -- Conclusions -- References.

Chapter 17: The Unilateral Biportal Endoscopic Paraspinal Approach for Lumbar Foraminal Pathology -- Introduction -- Relevant Anatomy -- Indications and Contraindications -- Surgical Procedure -- Step 1: Patient Positioning and Anesthesia -- Step 2: Entry Point Planning -- Step 3: Triangular Paraspinal Approach -- Step 4: Identifying the Bone Landmarks -- Step 5: Bone Decompression -- Step 6: Release of the Exiting Nerve -- Illustrated Cases -- Discussion -- Conclusion -- References -- Chapter 18: Challenging Cases Treated with UBE: The Far-Out Syndrome -- Introduction -- Diagnosis -- Biportal Endoscopic Decompression of Far-Out Syndrome -- Rationale -- Indications and Contraindications -- Relevant Surgical Anatomy -- Surgical Technique -- Step 1: Anesthesia and Patient Position -- Step 2: Skin Incision Planning -- Step 3: Biportal (Triangular) Approach -- Step 4: Completing the Working Space to Identify the Bone Landmarks -- Step 5: Bone Removal and Nerve Root Decompression -- Step 6: Other Maneuvers -- Step 7: Final Suggestions and Wound Closure -- Illustrated Cases -- Discussion -- Conclusions -- References -- Untitled -- Chapter 19: The Biportal Endoscopic Contralateral Approach for Juxtafacet Cystic Lesions of the Lumbar Spine -- Introduction -- Indications and Contraindications of the Biportal Endoscopic Contralateral Approach -- Surgical Technique -- Step 1: Patient Position and Anesthesia -- Step 2: Organization of Surgical Staff -- Step 3: Location of Entry Points -- Step 4: Contralateral Biportal Approach-Triangulation -- Step 5: Contralateral Biportal Endoscopic

Approach Through a Sublaminar Route -- Step 6: Creating the Working Space -- Step 7: Bone Removal -- Step 8: Cyst Removal and Flavectomy -- Step 9: Direct Decompression of the Traversing Nerve Root -- Step 10: Hemostasis and Closure -- Illustrated Cases -- Discussion -- Conclusion.
