

1. Record Nr.	UNINA9910633918103321
Titolo	Guide for Advanced Nursing Care of the Adult with Congenital Heart Disease // edited by Serena Francesca Flocco, Hajar Habibi, Federica Dellafiore, Christina Sillman
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer , 2022
ISBN	3-031-07598-6
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (325 pages)
Disciplina	616.12 616.120231
Soggetti	Nursing Cardiology Malalties del cor Malformacions del cor Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Foreword -- Part 1 Epidemiology, anatomy and pathophysiology -- 1 Incidence of congenital heart disease and relevance in adulthood -- 2 Cardiac defects -- Part 2 Transition from pediatric to adult care -- 3 Transitional care for young people -- 4 Advancing high value transitional care: the central role of nursing and its leadership -- 5 Building a transition program -- Part 3 The role of the advance nurse practitioner in the care of ACHD patients in different care setting -- 6 The nursing care in the outpatient and hospital setting -- 7 The nursing care in the Cath Lab -- 8 The nursing care in critical setting -- Part 4 Advanced heart failure in ACHD- 9 Management of acute heart failure -- 10 Mechanical circulatory support strategies -- 11 Heart Transplantation: the challenging journey of an ACHD -- Part 5 Adult Congenital Heart Disease and pregnancy -- 12 Congenital heart diseases during pregnancy -- 13 The nursing care in critical setting Contraception, family planning and pregnancy management: the nurse specialists role -- Part 6 Physical activity and sport -- 14

Rehabilitation's point break: changing for improving -- 15 Promotion of daily physical activity and exercise for adults with Congenital Heart Disease -- Part 7 Patient Self-care and Nursing role for patients' education -- 16 Connecting dots for framing health: the self-care process -- 17 Patient education to self-management -- 18 The health engagement of adult congenital heart disease patients -- 19 Counseling can improve quality of life in Adult Congenital Heart Disease -- Part 8 End-of-life care: nursing care in the final stage of life -- 20 Advance Care Planning and Advance Directives -- Part 9 Coronavirus Disease 2019 (COVID19) pandemic implications in ACHD -- 21 COVID 19 and congenital heart disease.

Sommario/riassunto

The aim of this book is to provide one central resource for nurses within the adult spectrum of life-long congenital heart disease care who are seeking expert guidance for their practice, regardless of clinical setting. Over the past 50 years, advances in surgical techniques and medical therapies have drastically improved the number of congenital heart disease patients surviving into adulthood, with the result being that there are now more adults than children living with congenital heart disease. In the past three decades, recognition of this new cardiology subspecialty has given way to formalized programs, standards of care, and multidisciplinary expertise. Indeed Nursing care of adult patients with congenital heart disease (ACHD) is a relatively new medical subspecialty with limited knowledge and guidance available and also an important component of the multidisciplinary care team. Nursing care of the ACHD encompasses a holistic approach to the physical, psychological, social, and spiritual wellbeing of these unique individuals across their lifespan. Understanding the intricacies for the various heterogeneous defect types, the transition from pediatric to adult care, the unique educational and self-care needs, life-events such as pregnancy/reproduction, advanced heart failure, and end-of-life care helps prepare the nurse caring for the ACHD patient. Nurses as a first point of care for the ACHD patients play a pivotal role in the education and empowerment of the ACHD patient population and provide an invaluable role in the multidisciplinary team and with this guide nurses can feel confident in the quality of the care they provide. This book aims to introduce nursing focused care to wider audiences, nurses, medical technicians, and physicians who are involved in the management and treatment of ACHD patients. Improving care and the quality of life for adult congenital heart disease patients with a multidisciplinary team-based approach, including nursing care, should be a central goal for all ACHD programs. .
