

1. Record Nr.	UNINA9910633938103321
Autore	Rizvi Syed Ali Asad
Titolo	Output feedback reinforcement learning control for linear systems / / Syed Ali Asad Rizvi, Zongli Lin
Pubbl/distr/stampa	Cham, Switzerland : , : Birkhauser, , [2023] ©2023
ISBN	3-031-15858-X
Descrizione fisica	1 online resource (304 pages)
Collana	Control engineering
Disciplina	629.8312
Soggetti	Control theory Feedback control systems Reinforcement learning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- Notation and Acronyms -- 1 Introduction to Optimal Control and Reinforcement Learning -- 1.1 Introduction -- 1.2 Optimal Control of Dynamic Systems -- 1.2.1 Dynamic Programming Method -- 1.2.2 The Linear Quadratic Regulation Problem -- 1.2.3 Iterative Numerical Methods -- 1.3 Reinforcement Learning Based Optimal Control -- 1.3.1 Principles of Reinforcement Learning -- 1.3.2 Reinforcement Learning for Automatic Control -- 1.3.3 Advantages of Reinforcement Learning Control -- Optimality and Adaptivity -- Model-Free Control -- Large Spectrum of Applications -- 1.3.4 Limitations of Reinforcement Learning Control -- 1.3.5 Reinforcement Learning Algorithms -- 1.4 Recent Developments and Challenges in Reinforcement Learning Control -- 1.4.1 State Feedback versus Output Feedback Designs -- 1.4.2 Exploration Signal/Noise and Estimation Bias -- 1.4.3 Discounted versus Undiscounted Cost Functions -- 1.4.4 Requirement of a Stabilizing Initial Policy -- 1.4.5 Optimal Tracking Problems -- 1.4.6 Reinforcement Learning in Continuous-Time -- 1.4.7 Disturbance Rejection -- 1.4.8 Distributed Reinforcement Learning -- 1.5 Notes and References -- 2 Model-Free Design of Linear Quadratic Regulator -- 2.1 Introduction -- 2.2 Literature Review -- 2.3 Discrete-Time LQR Problem -- 2.3.1 Iterative Schemes Based on State Feedback -- 2.3.2

Model-Free Output Feedback Solution -- 2.3.3 State Parameterization of Discrete-Time Linear Systems -- 2.3.4 Output Feedback Q-function for LQR -- 2.3.5 Output Feedback Based Q-learning for the LQR Problem -- 2.3.6 Numerical Examples -- 2.4 Continuous-Time LQR Problem -- 2.4.1 Model-Based Iterative Schemes for the LQR Problem -- 2.4.2 Model-Free Schemes Based on State Feedback -- 2.4.3 Model-Free Output Feedback Solution -- 2.4.4 State Parameterization. 2.4.5 Learning Algorithms for Continuous-Time Output Feedback LQR Control -- 2.4.6 Exploration Bias Immunity of the Output Feedback Learning Algorithms -- 2.4.7 Numerical Examples -- 2.5 Summary -- 2.6 Notes and References -- 3 Model-Free H Disturbance Rejection and Linear Quadratic Zero-Sum Games -- 3.1 Introduction -- 3.2 Literature Review -- 3.3 Discrete-Time Zero-Sum Game and H Control Problem -- 3.3.1 Model-Based Iterative Algorithms -- 3.3.2 State Parameterization of Discrete-Time Linear Systems Subject to Disturbances -- 3.3.3 Output Feedback Q-function for Zero-Sum Game -- 3.3.4 Output Feedback Based Q-learning for Zero-Sum Game and H Control Problem -- 3.3.5 A Numerical Example -- 3.4 Continuous-Time Zero-Sum Game and H Control Problem -- 3.4.1 Model-Based Iterative Schemes for Zero-Sum Game and H Control Problem -- 3.4.2 Model-Free Schemes Based on State Feedback -- 3.4.3 State Parameterization -- 3.4.4 Learning Algorithms for Output Feedback Differential Zero-Sum Game and H Control Problem -- 3.4.5 Exploration Bias Immunity of the Output Feedback Learning Algorithms -- 3.4.6 Numerical Examples -- 3.5 Summary -- 3.6 Notes and References -- 4 Model-Free Stabilization in the Presence of Actuator Saturation -- 4.1 Introduction -- 4.2 Literature Review -- 4.3 Global Asymptotic Stabilization of Discrete-Time Systems -- 4.3.1 Model-Based Iterative Algorithms -- 4.3.2 Q-learning Based Global Asymptotic Stabilization Using State Feedback -- 4.3.3 Q-learning Based Global Asymptotic Stabilization by Output Feedback -- 4.3.4 Numerical Simulation -- 4.4 Global Asymptotic Stabilization of Continuous-Time Systems -- 4.4.1 Model-Based Iterative Algorithms -- 4.4.2 Learning Algorithms for Global Asymptotic Stabilization by State Feedback -- 4.4.3 Learning Algorithms for Global Asymptotic Stabilization by Output Feedback -- 4.4.4 Numerical Simulation. 4.5 Summary -- 4.6 Notes and References -- 5 Model-Free Control of Time Delay Systems -- 5.1 Introduction -- 5.2 Literature Review -- 5.3 Problem Description -- 5.4 Extended State Augmentation -- 5.5 State Feedback Q-learning Control of Time Delay Systems -- 5.6 Output Feedback Q-learning Control of Time Delay Systems -- 5.7 Numerical Simulation -- 5.8 Summary -- 5.9 Notes and References -- 6 Model-Free Optimal Tracking Control and Multi-Agent Synchronization -- 6.1 Introduction -- 6.2 Literature Review -- 6.3 Q-learning Based Linear Quadratic Tracking -- 6.4 Experience Replay Based Q-learning for Estimating the Optimal Feedback Gain -- 6.5 Adaptive Tracking Law -- 6.6 Multi-Agent Synchronization -- 6.7 Numerical Examples -- 6.8 Summary -- 6.9 Notes and References -- References -- Index.
