

1.	Record Nr.	UNISALENTO991000524389707536
	Autore	Kibre, Pearl
	Titolo	Studies in medieval science : alchemy, astrology, mathematics, and medicine / Pearl Kibre
	Pubbl/distr/stampa	London : Hambledon press, 1984
	ISBN	0907628214
	Descrizione fisica	376 p. ; 23 cm.
	Collana	History series ; 19
	Disciplina	509.02
	Soggetti	Scienze - Storia
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910633944803321
	Autore	Haddow Gillian
	Titolo	Embodiment and everyday cyborgs : technologies that alter subjectivity // Gillian Haddow
	Pubbl/distr/stampa	Manchester, England : , : Manchester University Press, , [2021] ©2021
	Descrizione fisica	1 online resource (xiii, 192 pages) : illustrations
	Collana	Inscriptions
	Disciplina	001.53
	Soggetti	Cybernetics Implants, Artificial
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references.

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Your organs are failing and require replacement. If you had the choice, would you prefer organs from other humans or non-human animals, or would you choose a 'cybernetic' medical implant? Using a range of social science methods and drawing on the sociology of the body and embodiment, biomedicine and technology, this book asks what happens to who we are (our identity) when we change what we are (our bodies)? From surveying young adults about whether they would choose options such as 3-D bioprinting, living or deceased human donation, or non-human animal or implantable biomechanical devices, to interviewing those who live with an implantable cardiac defibrillator, Haddow invites us to think about what kind of relationship we have with our bodies. She concludes that the reliance on 'cybernetic' medical devices create 'everyday cyborgs' who can experience alienation and new forms of vulnerability at implantation and activation. Embodiment and everyday cyborgs invites readers to consider the relationship between personal identity and the body, between humans and non-human animals, and our increasing dependency on 'smart' implantable technology. The creation of new techno-organic hybrid bodies makes us acutely aware of our own bodies and how ambiguous the experience of embodiment actually is. It is only through understanding how modifications such as transplantation, amputation and implantation make our bodies a 'presence' to us, Haddow argues, that we realise our everyday experience of our bodies as an absence.
