

1. Record Nr.	UNINA9910633947303321
Titolo	Nominal anchoring : Specificity, definiteness and article systems across languages / / Kata Balogh, Robert D. Van Valin, Anja Latrouite
Pubbl/distr/stampa	Language Science Press, 2020 [s.l.] : , : Language Science Press, , 2020
ISBN	9783961102846 3961102848
Descrizione fisica	1 online resource (211 p.)
Collana	Topics at the Grammar-Discourse Interface
Soggetti	Biography & Autobiography Biographies.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The papers in this volume address to different degrees issues on the relationship of articles systems and the pragmatic notions of definiteness and specificity in typologically diverse languages: Vietnamese, Siwi (Berber), Russian, Mopan (Mayan), Persian, Danish and Swedish. The main questions that motivate this volume are: How do languages with and without an article system go about helping the hearer to recognize whether a given noun phrase should be interpreted as definite, specific or non-specific? Is there clear-cut semantic definiteness without articles or do we find systematic ambiguity regarding the interpretation of bare noun phrases? If there is ambiguity, can we still posit one reading as the default? What exactly do articles in languages encode that are not analyzed as straightforwardly coding (in)definiteness? Do we find linguistic tools in these languages that are similar to those found in languages without articles? Most contributions report on research on different corpora and elicited data or present the outcome of various experimental studies. One paper presents a diachronic study of the emergence of article systems. On the issue of how languages with and without articles guide the hearer to the conclusion that a given noun phrase</p>

should be interpreted as definite, specific or non-specific, the studies in this paper argue for similar strategies. The languages investigated in this volume use constructions and linguistic tools that receive a final interpretation based on discourse prominence considerations and various aspects of the syntax-semantics interface. In case of ambiguity between these readings, the default interpretation is given by factors (e. g., familiarity, uniqueness) that are known to contribute to the salience of phrases, but may be overridden by discourse prominence. Articles that do not straightforwardly mark (in)definiteness encode different kinds of specificity. In the languages studied in this volume, whether they have articles or do not have an article system, we find similar factors and linguistic tools in the calculation process of interpretations. The volume contains revised selected papers from the workshop entitled Specificity, definiteness and article systems across languages held at the 40th Annual Conference of the German Linguistic Society (DGfS), 7-9 March, 2018 at the University of Stuttgart.
