Sommario/riassunto	This Special Issue of the Journal for the Study of Antisemitism contains a collection of papers that were presented at the International Conference "Contemporary Antisemitism and Racism in the Shadow of the Holocaust"-the midterm conference of the Research Network on Ethnic Relations, Racism and Antisemitism within the European Sociological Association. The network was set up over a decade ago with the aim of addressing what was felt to be a serious gap in contemporary social theory, the continuing and indeed growing presence of antisemitism and its connection to other racisms.
