

1. Record Nr.	UNINA9910633969503321
Titolo	New knowledge about pulmonary thromboembolism / / edited by Jelena Stojsic
Pubbl/distr/stampa	London : , : IntechOpen, , [2022] ©2022
ISBN	1-83969-967-1
Descrizione fisica	1 online resource (86 pages)
Disciplina	616.249
Soggetti	Pulmonary embolism Thromboembolism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introductory Chapter: Pulmonary Embolism. 2. Diagnosis of Pulmonary Embolism. 3. Pulmonary Embolism in COVID-19 Patients: Facts and Figures. 4. Anticoagulants in the Management of Pulmonary Embolism. 5. Thrombolytic Therapy in Pulmonary Thromboembolism.
Sommario/riassunto	Thromboembolism is the most common cause of death in autopsied patients. Recently, this disorder has become a topic of interest due to it being a frequent complication of COVID-19 infection. This book discusses pulmonary thromboembolism in COVID-19 and non-COVID-19 patients, such as those with malignancies such as paraneoplastic symptoms or heart and lung diseases.
