1.
Record Nr.	UNINA9910634062503321
Autore	Seifermann Stephan
Titolo	Architectural Data Flow Analysis for Detecting Violations of Confidentiality Requirements / / Stephan Seifermann
Pubbl/distr/stampa	Karlsruhe : , : KIT Scientific Publishing, , 2022
Descrizione fisica	1 online resource (xiv, 282 pages)
Collana	The Karlsruhe series on software design and quality
Disciplina	342.0858
Soggetti	Confidential communications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Software vendors must consider confidentiality especially while creating software architectures because decisions made here are hard to change later. Our approach represents and analyzes data flows in software architectures. Systems specify data flows and confidentiality requirements specify limitations of data flows. Software architects use detected violations of these limitations to improve the system. We demonstrate how to integrate our approach into existing development processes.
