

1. Record Nr.	UNINA9910635096703321
Titolo	Burgaschisee 5000-3000 v. Chr : Siedlungsdynamik und Mobilitat, Landnutzung und Subsistenz // edited by Albert Hafner, Marco Hostettler
Pubbl/distr/stampa	Leiden : , : Sidestone Press, , 2022 ©2022
Descrizione fisica	1 online resource (502 pages)
Collana	Open Series in Prehistoric Archaeology
Disciplina	930.1
Soggetti	Antiquities, Prehistoric
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Lake Burgaschi is a small lake on the Swiss Plateau, which has been inhabited since the Mesolithic, but is best known for its Neolithic lakeside settlements. Archaeological research has been conducted at Lake Burgaschi for the last 170 years, undergoing all the developments to modern archaeology. Recently, Lake Burgaschi has been re-explored as part of an interdisciplinary research project under the direction of the Institute of Archaeological Sciences at the University of Bern. Excavations were carried out at various sites around Lake Burgaschi, allowing for a new precise chronological classification of already known sites, but also revealing previously unknown settlement sites on the lakeshore. Furthermore, by means of interdisciplinary investigations on the pottery, animal and human bones as well as flint artefacts, previous knowledge on subsistence, mobility and land-use has been substantially extended. The present volume closes a long lasting research gap and combines new results with ancient data to a comprehensive synthesis.
