

1. Record Nr.	UNINA9910635097503321
Autore	Zambelli Matteo
Titolo	La Conoscenza per il progetto : Il case-based reasoning nell'architettura e nel design // Matteo Zambelli
Pubbl/distr/stampa	Florence : , : Firenze University Press, , 2022 ©2022
Descrizione fisica	1 online resource (184 pages)
Collana	Ricerche. Architettura, Pianificazione, Paesaggio, Design
Disciplina	333.72
Soggetti	Landscape protection
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Case-based reasoning is a cognitive model developed to explain how people reason in problem solving. According to this model, a person resorts to knowledge and strategies used in the past to solve or understand a problem that is similar to the current one. Case-based reasoning applied to design is called case-based design. La conoscenza per il progetto explains the scientific reasons and why knowledge is crucial to be a good designer and proposes a method for analysing, breaking down and archiving cases of architecture and design (but not only), the typical knowledge of designers, in order to be able to consciously reuse it in a new project.
