## Sommario/riassunto

The University of Chicago has been and continues to be one of the most important global centres for economics. With six chapters on themes in Chicago economics and 33 chapters on the lives and work of Chicago economists, this volume shows how economics became established at the University, how it produced some of the world's best-known economists, including Frank Knight, Milton Friedman and Robert Lucas, and how it remains a global force for the very best in teaching and research in economics. With original contributions from a stellar cast, this volume provides economists – especially those interested in macroeconomics and the history of economic thought – with an in-depth analysis of Chicago economics. Robert A. Cord holds a PhD from the University of Cambridge, and his areas of interest include the history of economic thought and, within this, the history of macroeconomics. His publications include *Reinterpreting the Keynesian Revolution* (2012), *Milton Friedman: Contributions to Economics and Public Policy* (co-editor; 2016) and *The Palgrave Companion to Oxford Economics* (editor; 2021).
