| Lingua di pubblicazione | Inglese  |
| Formato                 | Materiale a stampa   |
| Livello bibliografico   | Monografia   |
| Nota di bibliografia    | Includes bibliographical references.   |
| Nota di contenuto       | General considerations -- Treatment decision -- Pyeloenteric fistula -- Nephropleural fistula -- Ureterocolonic fistula -- Colovesical and small bowel fistulas -- Vesicocutaneous fistula -- Fistula after kidney transplantation -- Urovascular fistula and pseudoaneurysm -- Vesicovaginal fistula: open approach -- Vesicovaginal fistula: minimally invasive surgery (MIS) approaches -- Vesicouterine fistula -- Ureterovaginal fistula -- Urethrovaginal fistula -- Rectovaginal fistula -- Obstetric fistula -- Rectovesical fistula -- Rectourethral fistula: perineal, transanal and posterior approaches -- Transanal, Transperineal, and Combined -- Abdominoperineal Approaches (Turnbull-Cutait) to Repair of Rectourethral Fistula -- Robotic Approach for Rectourethral Fistula -- Urethropubic, urethrocutaneous and urethroperineal fistulas -- Neovagina Fistulas -- Neopenis fistula -- Complications of Vaginal Fistula Repair. |
| Sommario/riassunto      | Although the condition of fistula is universal, this new book addresses not only obstetric fistulas that have been the most studied, but also those that affect men and those related to specific situations such as   |

kidney transplantation. We also make the first formal publication on fistulas present in transgender patients, which have never been studied before. The book is organized in an accessible way and with collaboration of leaders in the field who contribute their knowledge and fully updated experience.
