

1. Record Nr.	UNINA9910637784803321
Autore	Tang Yan-Dong
Titolo	Pseudorabies Virus
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
ISBN	3-0365-5985-X
Descrizione fisica	1 online resource (294 p.)
Soggetti	Biology, life sciences Microbiology (non-medical) Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Pseudorabies virus (PRV) is an important swine pathogen that impacts swine industry worldwide. PRV belongs to the alpha herpes virus subfamily of the herpesviruses that has been widely used as a model herpes virus. Most recently, PRV has been reported sporadically spillover into human and other animals. This book collects the newest advances in the field of pseudorabies virus research, including critical reviews and research on viral evolution, replication, virus-host interaction, pathogenesis and immunity, and novel antiviral strategies.
