Sommario/riassunto	"Thiven Reddy shows how conventional approaches to understanding democratization have failed to capture the complexities of South Africa's post-Apartheid transition. Rather, as a product of imperial expansion, the South African state, capitalism and citizen identities have been uniquely shaped by a particular mode of domination, namely settler colonialism. South Africa, Settler Colonialism and the Failures of Liberal Democracy is an important work that sheds light on the nature of modernity, democracy and the complex politics of contemporary South Africa."--Page 4 of cover.

Sommario/riassunto	This Special Issue of Atmosphere focuses on hydrometeorological extremes and their local impacts on human-environment systems. Particularly, we accepted submissions on the topics of observational and model-based studies that could provide useful information for infrastructure design, decision making, and policy making to achieve our goals of enhancing the resilience of human-environment systems to climate change and increased variability.
