

1. Record Nr.	UNINA9910639981903321
Autore	Brintzenhofe Kurt T.
Titolo	Investigating human interaction through mathematical analysis : the queue transform / / Kurt T. Brintzenhofe
Pubbl/distr/stampa	New York, NY : , : Routledge, , 2023
ISBN	1-00-332516-5 1-003-32516-5
Descrizione fisica	1 electronic resource (217 p.)
Classificazione	03-XX08-XX28-XX
Disciplina	302.01/5118
Soggetti	Social interaction - Mathematical models Queuing theory Abelian groups Algebra, Abstract Psychophysics MATHEMATICS / Algebra / General MATHEMATICS / Applied PSYCHOLOGY / General
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Social psychology and psychophysics : laying the foundation -- Milgram's drawing power of crowds and social impact theory -- Revisiting Milgram's 1978 "response to intrusion into waiting lines" experiment -- Applying the queue transform to experiments outside the queue -- From the queue to the commons -- Defining an algebraic group in social space -- History as data.
Sommario/riassunto	"An Algebraic Structure for Basic Western Social Systems in Social Space offers a new and unique approach to social intragroup interaction by using mathematics and psychophysics to create a mathematical model based on social psychological theories. This is fascinating reading for academics and advanced students interested in political theory, detection theory, social psychology, organizational behavior, psychophysics, and applied mathematics in the social and information sciences"--
