1. Record Nr. UNINA9910639985403321 Autore Gonzalez-Bulnes Antonio **Titolo** Nanotechnology in Animal Science Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022 Pubbl/distr/stampa **ISBN** 3-0365-5946-9 Descrizione fisica 1 electronic resource (262 p.) Soggetti Technology: general issues Lingua di pubblicazione Inglese **Formato** Materiale a stampa Monografia Livello bibliografico Recently, a revolution in nanotechnology has pervaded all fields related Sommario/riassunto to animal science. This book collection focuses on the potential applications of nanotechnology in the field of animal science, particularly livestock production and medication. The studies/reviews published in this book show the preparation protocols and physiochemical and biological properties of the innovated nanoparticles, designated for different purposes. This is in line with the potential hazards of these materials. The book collection shows that nanoparticles and nanoparticle-based systems can be developed to serve different purposes in the field of animal production and veterinary, such as the management of reproduction and assisted

treatment, drug delivery, and animal nutrition.

reproductive techniques, rapid and robust disease diagnosis and
