

1. Record Nr.	UNINA9910642743503321
Titolo	Advances in enzymology and related areas of molecular biology . Volume XVIII [[electronic resource] ./] / edited by Alton Meister
Pubbl/distr/stampa	New York, : Wiley, 1957
ISBN	1-282-68233-4 9786612682339 0-470-12263-3 0-470-12340-0
Edizione	[11th ed.]
Descrizione fisica	1 online resource (444 p.)
Collana	Advances in enzymology and related areas of molecular biology ; ; 18
Altri autori (Persone)	MeisterAlton
Disciplina	574.192 612.0151
Soggetti	Clinical enzymology Enzymes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	ADVANCES IN ENZYMOLOGY AND RELATED SUBJECTS OF BIOCHEMISTRY; CONTENTS; Cytochrome in Higher Plants; Newer Knowledge of Succinic Dehydrogenase; Mechanism of the Toxicity of the Active Constituent of Dichapetalum cymosum and Related Compounds; Deoxyribonucleoprotein. a Genetic Material; Pyrophosphorylases and Phosphorylases in Biosynthetic Reactions; Le role biosynthetic du cycle des acides tricarboxyliques; Reaction Paths in the Respiration of the Higher Plants; The Chemistry and Function of Lipoic Acid; Lignification; Author Index; Subject Index; Cumulative Indexes of Volumes I-XVIII
Sommario/riassunto	Advances in Enzymology and Related Areas of Molecular Biology is a seminal series in the field of biochemistry, offering researchers access to authoritative reviews of the latest discoveries in all areas of enzymology and molecular biology. These landmark volumes date back to 1941, providing an unrivaled view of the historical development of enzymology. The series offers researchers the latest understanding of enzymes, their mechanisms, reactions and evolution, roles in complex biological process, and their application in both the laboratory and

industry. Each volume in the series featu
