|-------------------------|--|
| 1. Record Nr.           | UNINA9910642763103321  |
| Titolo                  | Colour vision [[electronic resource] ] : physiology and experimental psychology : Ciba Foundation Symposium / / edited by A.V.S. de Reuck and Julie Knight   |
| Pubbl/distr/stampa      | London, : J. & A. Churchill, 1965  |
| ISBN                    | 1-280-58987-6<br>9786613619709<br>0-470-71940-0<br>0-470-71694-0   |
| Descrizione fisica      | 1 online resource (404 p.)   |
| Collana                 | Ciba Foundation symposium  |
| Altri autori (Persone)  | De ReuckAnthony V. S<br>KnightJulie  |
| Disciplina              | 591.18   |
| Soggetti                | Color vision   |
| Lingua di pubblicazione | Inglese  |
| Formato                 | Materiale a stampa   |
| Livello bibliografico   | Monografia   |
| Note generali           | Description based upon print version of record.  |
| Nota di bibliografia    | Includes bibliographical references and indexes.   |
| Nota di contenuto       | Colour Vision: Physiology and Experimental Psychology; Contents; Chairman's introduction; Visual pigments; The clustering of fish visual pigments around discrete spectral positions and its bearing on chemical structure; Discussion; Adaptation of visual pigments to the photic environment; Discussion; Duplicity theory and the microstructure of the retina; Rods and cones-a fresh approach; Discussion; Duality in the retina; Discussion; The synaptology of the retina; Discussion; Theories of colour vision; Sketch of the present position of the Young- Helmholtz theory of colour vision; Discussion Cellular mechanisms of a Young-Hering visual systemComment; Discussion; Visual pigments of single cones; Discussion; The retinex; Discussion; Human colour vision; The genetics of colour blindness; Discussion; After-images as a means of investigating rods and cones; Discussion; Introduction to discussion of theories of colour vision and human colour vision; General Discussion Genetics of colour vision Discussion Dark adaptation and after-images A new visual pigment at 690 nm. in t; Animal colour vision; The physiological basis of colour vision in honeybees |

The spectral sensitivity and visual pigment content of the retina of  
Gekko gekko Discussion; Colour discrimination in cats; Discussion;  
General Discussion Psychological aspects of colour vision Spectral  
sensitivity of the rabbit retina Lines for future research Future  
intentions of participants; Author index; Subject index
