Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Advances in Photochemistry; Contents; Application of Electron Spin Resonance Spectroscopy to Photochemistry: Primary Processes and Energy Transfer: Consistent Terms and Definitions; Solution-Phase Photochemistry of Cyclobutanones; Phosphorescence-Microwave Multiple Resonance Spectroscopy; Photochemistry of the Troposphere; Author Index; Subject Index It is rare that a series can claim a unique status but Advances in Sommario/riassunto Photochemistry is alone in providing one of the only forums for critical and authorative evaluation of advances in the discipline of photochemistry. Founded in 1963, the series has provided an open forum for pioneers in the field to expand and explore new and radical ideas at the forefront of photochemical research, with each new volume providing a stimulating review of the latest breakthrough and theories in this rapidly developing field. Covering areas as diverse as photochemistry's uses and applications in materials science
