

1. Record Nr.	UNINA9910644261203321
Titolo	Intelligent Autonomous Systems 17 : Proceedings of the 17th International Conference IAS-17 // edited by Ivan Petrovic, Emanuele Menegatti, Ivan Markovi
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2023
ISBN	3-031-22216-4
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (941 pages)
Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 577
Disciplina	629.892 629.89263
Soggetti	Computational intelligence Control engineering Robotics Automation Industrial engineering Production engineering Computational Intelligence Control, Robotics, Automation Industrial and Production Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intro -- Program Committee -- Preface -- Contents -- Collaborative Robots -- Evaluation of Software Solutions for Risk Assessment Focusing on Human-Robot Collaboration -- 1 Introduction -- 2 Risk Assessment -- 3 Study Procedure -- 3.1 Selection of Software Solutions Included in the Study -- 3.2 Study Realization -- 3.3 Definition of Evaluation Criteria -- 3.4 Evaluation System and Weighting -- 4 Evaluation Results -- 4.1 Expert Requirements -- 4.2 Suitability for HRC -- 5 Discussion -- 6 Conclusion -- References -- Goal Inference via Corrective Path Demonstration for Human-Robot Collaboration -- 1 Introduction -- 2 Overview of the Proposed System -- 2.1 Assumed Environment -- 2.2 Flow of the Proposed System -- 3 Learning from Corrective Path Demonstration -- 3.1 Position Samples

Generation -- 3.2 Learning Relations with Surrounding Objects
Probabilistically -- 4 Goal Inference -- 4.1 Partial Probability Map
Calculation -- 4.2 Integration and Goal Inference -- 5 Experiment --
5.1 Experimental Setting -- 5.2 Result -- 6 Conclusion -- References
-- Skeleton-Based Action and Gesture Recognition for Human-Robot
Collaboration -- 1 Introduction -- 2 Related Works -- 3 Methods --
3.1 Pose Estimation -- 3.2 3D Pose Estimation -- 3.3 Action and
Gesture Recognition -- 3.4 Ensemble Averaging of the Classifiers
Predictions -- 4 IAS-Lab Collaborative HAR Dataset -- 5 Experimental
Results -- 5.1 Pre-training on the NTU RGB+D Dataset -- 5.2 Fine-
Tuning on the IAS-Lab Collaborative HAR Dataset -- 5.3 Ensemble
Results Using Body and Hands Models -- 6 Conclusions -- References
-- Benchmarking Variable-Stiffness Grippers -- 1 Introduction -- 2
State of the Art -- 3 Test Description -- 3.1 Adaptation Test -- 3.2
Finger Force Test -- 3.3 Grasp Strength Test -- 3.4 Gripper Payload
Test -- 4 Experiments -- 4.1 Variable-Stiffness Gripper (VSGrip).
4.2 Piston Gripper (PistGrip) -- 4.3 Parallel Gripper (ParGrip) -- 4.4
Stiffness States -- 5 Results and Discussions -- 5.1 Object Grasping
Test -- 5.2 Finger Force Test -- 5.3 Grasp Strength Test -- 5.4 Gripper
Payload Test -- 6 Conclusions -- References -- Evaluation of Safe
Reinforcement Learning with CoMirror Algorithm in a Non-Markovian
Reward Problem -- 1 Introduction -- 2 Related Work -- 3 Preliminaries
and Problem Setting -- 4 CoMirror Descent Search -- 5 Experiments --
5.1 Experiment with Non-Markovian Reward and Cost -- 5.2 Result --
5.3 Discussion -- 6 Conclusion -- References -- Validation of Shared
Intelligence Approach for Teleoperating Telepresence Robots Through
Inaccurate Interfaces -- 1 Introduction -- 2 Shared Intelligence -- 3
Methods -- 3.1 Participants -- 3.2 User's Interfaces -- 3.3
Telepresence Platform -- 3.4 Experiment -- 4 Results -- 5 Conclusion
-- References -- Uncertainty Estimation for Safe Human-Robot
Collaboration Using Conservation Measures -- 1 Introduction -- 2
Uncertainty and Safety in HRC -- 3 Methodology -- 3.1 Problem
Statement -- 3.2 Classification of Uncertainties -- 3.3 Uncertainty
Quantification -- 3.4 Use Case: Human Robot Collaboration -- 4
Experiments -- 4.1 Datasets -- 4.2 Conservation Properties and Type B
Uncertainties -- 4.3 Validation, Evaluation and Results -- 4.4 Results
-- 4.5 Mapping on Safety Limit -- 4.6 Limitations -- 4.7 Discussion --
5 Conclusion and Outlook -- References -- Post-facto Misrecognition
Filter Based on Resumable Interruptions for Coping with Real World
Uncertainty in the Development of Reactive Robotic Behaviors -- 1
Introduction -- 2 Past Work -- 2.1 Control Structures for Reactive Task
Definition -- 2.2 Robust Recognition Using Neural Networks and Data
Filtering Algorithms -- 2.3 Attaining Zero Resumption Overhead.
3 Post-facto Misrecognition Filter Based on Resumable Interruptions --
4 Experiments -- 4.1 Setup -- 4.2 Results -- 5 Conclusions --
References -- Gestural and Touchscreen Interaction for Human-Robot
Collaboration: A Comparative Study -- 1 Introduction -- 2 Background
-- 3 Design Principles -- 4 Implementation -- 4.1 Graphical User
Interface -- 4.2 Input -- 4.3 Logic -- 5 Experiment -- 5.1
Experimental Setup -- 5.2 Description of the Experiment -- 6 Results
-- 6.1 Assessment of SLOTH Performance -- 6.2 Analysis of
Questionnaires -- 6.3 Time Analysis -- 7 Conclusions -- References --
Development and Evaluation of Fiber Reinforced Modular Soft Actuators
and an Individualized Soft Rehabilitation Glove -- 1 Introduction -- 2
Methods -- 2.1 Soft Actuators -- 2.2 Dummy Finger and Hand -- 2.3
Rehabilitation Glove -- 2.4 Characterization of Soft Actuators with the
Dummy Finger -- 2.5 Evaluation of Prototype Rehabilitation Glove -- 3
Results -- 3.1 Characterization of Actuators with the Dummy Fingers

-- 3.2 Evaluation of Prototype Rehabilitation Glove -- 4 Discussion --
5 Conclusion -- References -- Navigation -- Minimum Displacement
Motion Planning for Movable Obstacles -- 1 Introduction -- 2 Minimum
Displacement Motion Planning -- 3 Algorithm for Minimum
Displacement Motion Planning -- 3.1 (a) Planning Phase -- 3.2 (b)
Refinement Phase -- 3.3 Optimality -- 4 Examples and Applications --
4.1 Theoretical Examples -- 4.2 Applications -- 5 Related Work -- 6
Conclusion -- References -- Mixed Use of Pontryagin's Principle and
the Hamilton-Jacobi-Bellman Equation in Infinite- and Finite-Horizon
Constrained Optimal Control -- 1 Introduction -- 2 Preliminaries --
2.1 Motivations for Using DIDO -- 3 Problem Formulation -- 4
Methodology -- 4.1 Application to State- Constrained Problem -- 4.2
Weak Solutions to HJB -- 5 Solving the Original Problem.
5.1 Convergence to Original Infinite-Horizon Problem -- 5.2
Approximation of Original Finite-Time Problem -- 6 Example -- 6.1
AUV -- 7 Conclusions and Future Work -- References -- Comparing
SONN Types for Efficient Robot Motion Planning in the Configuration
Space -- 1 Introduction -- 2 Self-Organizing Neural Networks -- 3
Methodology -- 3.1 Model Selection -- 3.2 Connection Reduction -- 4
Evaluation -- 4.1 Qualitative Analysis -- 4.2 Parameter Setting -- 4.3
Comparison of the Different Models -- 4.4 Path Analysis -- 5
Conclusion -- References -- Physics-Based Motion Planning of a Fruit
Harvesting Manipulator for Pushing Obstacles in a Cluttered
Environment -- 1 Introduction -- 2 Overview of the System -- 2.1
Work -- 2.2 Robot -- 2.3 System Flow -- 3 Physics-Based Motion
Planning -- 3.1 Exploration in the Configuration Space -- 3.2 Physics
Simulation -- 3.3 State Validity Check -- 3.4 Motion Selection
and Reconstruction -- 4 Consideration of an Evaluation Index -- 5
Evaluation -- 5.1 Method -- 5.2 Conditions -- 5.3 Results -- 6
Conclusion -- References -- A Dynamics-Aware NMPC Method for
Robot Navigation Among Moving Obstacles -- 1 Introduction -- 2
Problem Formulation -- 3 The Proposed NMPC Approach -- 4 Collision
Avoidance -- 4.1 Preliminaries -- 4.2 Avoidable Collision States -- 4.3
Use of the ACS Condition in the NLP -- 5 Simulations -- 5.1 Static
Environments -- 5.2 Dynamic Environments -- 6 Conclusion --
References -- Benchmark of Sampling-Based Optimizing Planners for
Outdoor Robot Navigation -- 1 Introduction -- 2 Related Work -- 3
Problem Formulation -- 3.1 Evaluation Metrics -- 3.2 Evaluation
Methodology -- 4 Experiments -- 4.1 Scenarios and Evaluation Setup
-- 4.2 Interpreting Results Metric-Wise -- 4.3 Combining the Metrics
for Absolute Ranking -- 5 Conclusion -- References.
3D Traversability Analysis in Forest Environments Based on Mechanical
Effort -- 1 Introduction -- 2 System Architecture -- 3 Experimental
Evaluation -- 4 Results and Discussion -- 5 Conclusion -- References
-- Two-step Planning of Dynamic UAV Trajectories Using Iterative -
Spaces -- 1 Introduction -- 2 Related Work -- 3 Method -- 3.1 -Space
Definition -- 3.2 Iterative -Spaces -- 3.3 Application to UAV Trajectory
Planning -- 4 Evaluation -- 5 Conclusion -- References -- End-to-End
Path Estimation and Automatic Dataset Generation for Robot Navigation
in Plant-Rich Environments -- 1 Introduction -- 2 Related Work -- 2.1
Traversable Region and Path Detection -- 2.2 Automatic Data
Annotation -- 3 Overview of the Proposed Method -- 4 Automatic Data
Generation by Trajectory Estimation -- 5 Path Estimation -- 6 Robot
Control Based on the Estimated Path -- 7 Experiments -- 7.1 Training
with the Automatically Generated Dataset -- 7.2 Navigation -- 8
Conclusions and Future Work -- References -- Localization on Indoor
Topological Maps-SCAM: Scale-Compatible Adaptive Monte-Carlo
Localization -- 1 Introduction -- 2 Background and Related Work -- 3

SCAM: Scale-Compatible Adaptive Monte-Carlo Localization -- 3.1
Prediction -- 3.2 Observation Update -- 4 Experimental Results and
Discussion -- 4.1 Experimental Hardware and Set-up -- 4.2
Localization on Hand-Drawn Maps -- 4.3 Consistency Checks of
Localization Results -- 4.4 Applicability of SCAM -- 4.5 Increased
Initial Pose Error Tolerance -- 5 Conclusion -- References --
Perception -- Hyperspectral 3D Point Cloud Segmentation Using
RandLA-Net -- 1 Introduction -- 2 Related Work -- 3 The
Hyperspectral Semantic Street Scene Dataset -- 4 Semantic
Classification with RandLA-Net -- 4.1 Pre-filtering -- 4.2 RandLA-Net
Implementation and Parameterization -- 5 Evaluation -- 6 Conclusion
and Outlook -- References.
3D Semantic Scene Perception Using Distributed Smart Edge Sensors.

Sommario/riassunto

"IAS has been held every two years since 1986 providing venue for the latest accomplishments and innovations in advanced intelligent autonomous systems. New technologies and application domains continuously pose new challenges to be overcome in order to apply intelligent autonomous systems in a reliable and user-independent way in areas ranging from industrial applications to professional service and household domains. The present book contains the papers presented at the 17th International Conference on Intelligent Autonomous Systems (IAS-17), which was held from June 13–16, 2022, in Zagreb, Croatia. In our view, 62 papers, authored by 196 authors from 19 countries, are a testimony to the appeal of the conference considering travel restrictions imposed by the COVID-19 pandemic. Our special thanks go to the authors and the reviewers for their effort—the results of their joint work are visible in this book. We look forward to seeing you at IAS-18 in 2023 in Suwon, South Korea!".
