

1. Record Nr.	UNINA9910645898703321
Titolo	Aspects of molecular medicine
Pubbl/distr/stampa	Amsterdam : , : Elsevier B.V., , [2023]-
ISSN	2949-6888
Descrizione fisica	1 online resource
Soggetti	Biochemistry Medical genetics Molecular Medicine Genetics, Medical Biochimie Génétique médicale biochemistry Periodical Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	"An Official Journal of the International Union of Biochemistry and Molecular Biology" "Aspects of Molecular Medicine is a gold open access journal with the goal of rapidly publishing new research articles and short reviews on the molecular and cellular basis of disease. Using tools from biochemistry, molecular and cellular biology, physiology, pharmacology, and pathology, the articles are intended to describe the mechanistic background of disease and make it understandable at the clinical level. By publishing recent cutting-edge research, it is complementary to its sister journal, Molecular Aspects of Medicine, which publishes only lengthy review articles on established aspects of molecular medicine. The purpose of Aspects of Molecular Medicine is to provide a clinical foundation for basic scientists and a rationalization of disease for the clinician."
