	Sommario/riassunto	This book constitutes the proceedings of the 17th IFIP International Conference on Distributed Applications and Interoperable Systems, DAIS 2017, held in Neuchâtel, Switzerland, in June 2017. The 11 papers presented together with 4 short papers in this volume were carefully reviewed and selected from 23 submissions. The papers are organized in topical sections on running system efficiently, storing data smartly, roaming in graph, building collaborative services, and making things safe.

	Sommario/riassunto	In recent years, there has been a growing interest in the use of experimental approaches to the study of media histories and their cultures. Doing media archaeological experiments, such as historical re-enactments and hands-on simulations with media historical objects, helps us to explore and better understand the workings of past media technologies and their practices of use. By systematically refl ecting on the methodological underpinnings of experimental media archaeology as a relatively new approach in media historical research and teaching, this book aims to serve as a practical handbook for doing media archaeological experiments. Doing Experimental Media Archaeology: Practice is the twin volume to Doing Experimental Media Archaeology: Theory, authored by Andreas Fickers and Annie van den Oever.

	Sommario/riassunto	Four hefty volumes contain the proceedings of the four specialty conferences which comprised the August 1996 conference--the 13th such conference known by the acronym "ICPR," a biennial meeting of the International Association for Pattern Recognition. Selected from close to 1,000 submissions were 11 invited talks, 63 oral presentations in each specialty conference, and a total of 452 posters. The volumes focus as follows: v.1: computer vision; v.2: patterna recognition and signal analysis; v.3: applications and robotic systems; and v.4: parallel and connectionist systems. No index.
