Livello bibliografico	Monografia
Sommario/riassunto	The massive resources the European Union is unleashing to rebuild after COVID-19 present a unique opportunity to deal with climate change and improve the ability of firms and individuals to compete in a more digital world. The Investment Report 2021-2022 examines how government interventions helped support investment and enabled firms to weather the crisis. The report's analysis is based on a unique set of databases and data from a survey of 12 500 firms conducted in the summer of 2021. These key findings, provide a short accessible summary of the main report's messages.
