

1. Record Nr.	UNINA9910646200803321
Autore	Pandey Manish
Titolo	Advances in Remote Sensing Technology and the Three Poles
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2022 ©2023
ISBN	1-119-78775-0 1-119-78774-2 1-119-78773-4
Descrizione fisica	1 online resource (475 pages)
Altri autori (Persone)	PandeyPrem C RayYogesh AroraAman JawakShridhar D ShuklaUma K
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Advances in Remote Sensing Technology and the Three Poles -- Contents -- About the Editors -- Notes on Contributors -- Foreword -- Preface -- List of Acronyms -- Section I Earth Observation (EO) and Remote Sensing (RS) Applications in Polar Studies -- 1 The Three Poles: Advances in Remote Sensing in Relation to Spheres of the Planet Earth -- 1.1 Introduction -- 1.1.1 Earth as a System and Components of the Earth System -- 1.1.2 Role of the "Three Poles" and the Three Poles Regions in the Earth System -- 1.1.2.1 Defining the Three Poles, Three Poles Regions, and Their Geographical Extent -- 1.1.2.2 Interaction Among Components of the Earth System and Role of the Three Poles -- 1.1.3 Advancement of RS Technologies in Relation to Their Application in the Three Poles Regions -- 1.1.3.1 Remote Sensing Technology Advancements -- 1.1.3.2 Role of Remote Sensing (RS) in Mapping/Monitoring/Quantitative Analysis of Sub-Systems of Our Planet in the Three Poles Regions -- 1.2 Aim of the Book and Its Five Sections -- 1.3 Overview of the Contributing Chapters Covering Research About Different Aspects of the Sub-Systems of Our Planet in

the Three Poles Regions -- 1.4 Summary and Recommendations --
 References -- 2 Continuous Satellite Missions, Data Availability, and
 Nature of Future Satellite Missions with Implications to Polar Regions --
 2.1 Introduction -- 2.1.1 Types of Orbit -- 2.1.1.1 High Earth Orbit
 (HEO) -- 2.1.1.2 Medium Earth Orbit (MEO) -- 2.1.1.3 Semi-
 Synchronous Orbit -- 2.1.1.4 Molniya Orbit -- 2.1.1.5 Low Earth Orbit
 (LEO) -- 2.1.1.6 Polar Orbit and Sun-Synchronous Orbit -- 2.1.1.7
 Lagrange's Point -- 2.2 Satellite Missions and Data Availability -- 2.3
 Future Satellite Missions -- 2.4 Applicability of Satellite Products in
 Three Poles Regions -- 2.5 Challenges and Limitations -- 2.6 Summary
 -- Acknowledgments -- References.
 3 Assessing the Accuracy of Digital Elevation Models for Darjeeling-
 Sikkim Himalayas -- 3.1 Introduction -- 3.2 Study Area -- 3.3
 Materials and Methods -- 3.3.1 Generation of Cartosat-1 DEM and
 Orthoimage -- 3.3.2 TanDEM-X -- 3.3.3 ALOS PALSAR -- 3.3.4 DGPS
 Survey for Obtaining Ground Control Points (GCPs) -- 3.3.5 Datum
 Transformation -- 3.3.6 Accuracy Assessment Methods -- 3.3.6.1
 Vertical Accuracy -- 3.3.6.2 Spatial Accuracy -- 3.4 Results and
 Discussion -- 3.4.1 Vertical Accuracy Assessment: Comparison of
 DEMs With Reference to GCPs -- 3.4.2 Vertical Accuracy of DEMs for
 Different Land Use Classes -- 3.4.2.1 Dense Forest -- 3.4.2.2 Open
 Forest -- 3.4.2.3 Tea Garden -- 3.4.2.4 Built-up Area -- 3.4.3 Spatial
 Accuracy Assessment: Comparison of DEMs With Reference to Stream
 Networks -- 3.5 Conclusions -- Acknowledgments -- References -- 4
 An Overview of Morphometry Software Packages, Tools, and Add-ons
 -- 4.1 Introduction -- 4.2 Overview of Morphometry Tools and
 Toolboxes -- 4.3 Stand-Alone Tools -- 4.4 Tools that Run within
 Coding Bases -- 4.5 Conclusion -- References -- 5 Landscape
 Modeling, Glacier and Ice Sheet Dynamics, and the Three Poles: A
 Review of Models, Softwares, and Tools -- 5.1 Introduction -- 5.2
 Taxonomy -- 5.2.1 Geomorphic Process-Based Models -- 5.2.2
 Classification Based on Process of Modeling -- 5.2.2.1 Based on
 Geomorphic Processes -- 5.2.2.2 Based on Modeling Process -- 5.3
 Working Principles for Geomorphological Models -- 5.3.1 Soil
 Production -- 5.3.2 Hillslope Transport -- 5.3.3 Land Sliding -- 5.3.4
 Fluvial Incision and Transport -- 5.3.5 Glacial Erosion -- 5.4 Landscape
 Evolution Models -- 5.4.1 DEM-Based Models -- 5.4.2 SIBERIA -- 5.4.3
 GOLEM -- 5.4.4 CASCADE -- 5.4.5 ZScape -- 5.4.6 CHILD -- 5.4.7
 CAESAR -- 5.4.8 APERO -- 5.4.9 SIGNUM (Simple Integrated
 Geomorphological Numerical Model).
 5.4.10 TTLEM (TopoToolbox Landscape Evolution Model) 1.0 -- 5.5
 Other Models -- 5.5.1 DELIM -- 5.5.2 EROS -- 5.5.3 Landscape
 Evolution Model Using Global Search -- 5.5.4 eSCAPE -- 5.5.5 r.sim.
 terrain 1.0 -- 5.6 Combined/Application-Specific Models -- 5.7
 Machine Learning Models -- 5.8 LEMs Developed for Glaciated
 Landscapes -- 5.9 Some Significant Glacier Evolution Models -- 5.10
 Models Developed for Alpine Regions -- 5.11 Models Developed for the
 Arctic Region -- 5.12 Models Developed for the Antarctic Region -- 5.13
 Conclusion and Future Prospects -- Acknowledgment -- Declaration of
 Competing Interest -- References -- 6 Spectral Indices Across Remote
 Sensing Platforms and Sensors Relating to the Three Poles: An Overview
 of Applications, Challenges, and Future Prospects -- 6.1 Introduction
 -- 6.2 Database and Methodology -- 6.3 Rationale of Different Spectral
 Indices Across RS Sensors and Platforms -- 6.4 RS Sensors and
 Platforms: Characteristics (Spatial, Temporal, Spectral, and Radiometric
 Resolutions) -- 6.5 Most Widely and Popularly Used Spectral Indices --
 6.5.1 Spectral Indices and Lithosphere -- 6.5.2 Spectral Indices and
 Hydrosphere -- 6.5.3 Spectral Indices and Atmosphere -- 6.5.4

Spectral Indices and Biosphere -- 6.5.5 Spectral Indices and Anthroposphere -- 6.6 Thematic Evolution and Trends -- 6.6.1 Thematic and Network Maps -- 6.7 Summary and Recommendations -- Acknowledgments -- References -- Section II Antarctica: The Southernmost Continent Having the South Pole Environment and Remote Sensing -- 7 Glacier Dynamics in East Antarctica: A Remote Sensing Perspective -- 7.1 Introduction -- 7.2 Satellite Remote Sensing of Glacier Dynamics in East Antarctica -- 7.3 Glacier Velocity Estimation Using Remote Sensing -- 7.3.1 Glacier Velocity Estimation Using SAR Interferometry -- 7.3.2 Glacier Velocity Estimation Using Offset Tracking. 7.4 Remote Sensing Based Dynamics of PRG: A Case Study -- 7.4.1 Data and Methods -- 7.4.2 Results and Discussion -- 7.4.2.1 Ice Front Location -- 7.4.2.2 Glacier Velocity Over the Period of 2016-2019 -- 7.4.3 Summary and Conclusion -- References -- 8 Terrestrial Deglaciation Signatures in East Antarctica -- 8.1 Introduction -- 8.2 Geomorphology -- 8.2.1 East Antarctica -- 8.3 Landform Variation Concerning Various Sectors and Elevation -- 8.3.1 Dronning Maud Land -- 8.3.2 Enderby Land -- 8.3.3 Mac. Robertson Land, Amery Ice Shelf, and Prince Elizabeth Land -- 8.3.4 Wilkes Land -- 8.4 Chronology -- 8.4.1 Dronning Maud Land -- 8.4.2 Enderby Land -- 8.4.3 Mac. Robertson Land, Amery Ice Shelf 's and Princess Elizabeth Land -- 8.4.4 Wilkes Land -- 8.5 Discussion -- 8.6 Conclusion -- Acknowledgments -- References -- 9 Geospatial Tools for Monitoring Vertebrate Populations in Antarctica With a Note on the Ecological Component of the Indian Antarctic Program -- 9.1 Introduction -- 9.2 Novel Geospatial Tools for Biodiversity Monitoring in Antarctica -- 9.2.1 Unmanned Aerial Vehicles -- 9.2.2 Satellite Imagery -- 9.3 Spatial Mapping of Seabirds Under the Indian Antarctic Program -- 9.4 Recommendations to Incorporate New Tools for Antarctic Wildlife Monitoring Program -- 9.5 Conclusion -- Acknowledgments -- References -- 10 Bryophytes of Larsemann Hills, East Antarctica and Future Prospects -- 10.1 Introduction -- 10.2 Study Area -- 10.3 Materials and Methods -- 10.4 Taxonomic Treatment -- 10.5 Phytosociological Studies -- 10.6 Results and Discussion -- 10.7 Future Prospects -- Acknowledgments -- References -- 11 Antarctic Sea Ice Variability and Trends Over the Last Four Decades -- 11.1 Introduction -- 11.2 Datasets and Methods -- 11.2.1 Sea Ice Extent Analysis -- 11.2.2 Analysis of Physical Parameters -- 11.3 Results and Discussion. 11.3.1 Sea Ice Variability in the Southern Ocean -- 11.3.2 Sea Ice Distribution With Respect to Ocean-Atmospheric Temperature -- 11.4 Summary and Conclusions -- Acknowledgments -- References -- Section III Himalayas: The Third Pole Environment and Remote Sensing -- 12 Some Unresolved Problems in the Himalaya: A Synoptic View -- 12.1 Introduction -- 12.2 Stratigraphic Ages, Basin Configuration, and Palaeontology -- 12.3 Sedimentology -- 12.4 Tectonics and Structure -- 12.5 Magmatism and Geochronology -- 12.6 Metamorphism -- 12.7 Mineral Deposits -- 12.8 Palaeomagnetic Studies -- 12.9 Glaciological Studies -- 12.10 Geomorphological Studies -- 12.11 Conclusion -- Acknowledgments -- References -- 13 Fluctuations of Kolahoi Glacier, Kashmir Valley, Its Assessment With Tree-Rings of Pinus wallichiana and Comparable Satellite Imageries and Field Survey Records -- 13.1 Introduction -- 13.2 Tree-Ring Sampling Site and Data Acquisition -- 13.3 Tree-Ring Chronology and Its Assessments -- 13.4 Fluctuations of Kolahoi Glacier: Existing Records and Its Assessment With Tree-Rings -- 13.5 Conclusions -- Acknowledgements -- References -- 14 Applications of ICESat-2 Photon Data in the Third

Pole Environment -- 14.1 Introduction -- 14.2 Brief Background About NASA's ICESat-2 Mission -- 14.3 Terrain Profiling From ICESat-2 Photon Elevations Over a Mountainous Region -- 14.4 Longitudinal Profiling of Rivers in a Mountainous Region -- 14.5 Inland Water Level Detection in Mountainous Regions Using ICESat-2 Photon Data -- 14.6 Inferring Annual Variations of Water Levels in Mountain Lakes Using ICESat-2's ATL13 Data Product -- 14.7 Inferring Lake Ice Phenology in Mountainous Regions Using ICESat-2 Photon Data -- 14.8 Estimating Tree Heights in Mountain Regions Using ICESat-2 Photon Data -- 14.9 Utilization of ICESat-2 Photon Data to Generate Digital Elevation Models.
14.10 Conclusion.
