

1. Record Nr.	UNINA9910647225503321
Titolo	Antibiotic Resistance : A One-Health Approach // edited by Piera Anna Martino
Pubbl/distr/stampa	[Place of publication not identified] : , : MDPI AG , 2023
ISBN	3-0365-6031-9
Descrizione fisica	1 online resource (170 pages)
Disciplina	615.329
Soggetti	Antibiotics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	About the Editor -- Preface to "Antibiotic Resistance: A One-Health Approach" -- Finding What Is Inaccessible: Antimicrobial Resistance Language Use among the One Health Domains -- Can the One Health Approach Save Us from the Emergence and Reemergence of Infectious Pathogens in the Era of Climate Change: Implications for Antimicrobial Resistance? -- Should the Increased Awareness of the One Health Approach Brought by the COVID-19 Pandemic Be Used to Further Tackle the Challenge of Antimicrobial Resistance? -- Swedish Efforts to Contain Antibiotic Resistance in the Environment-A Qualitative Study among Selected Stakeholders -- Awareness of Antimicrobial Resistance and Associated Factors among Layer Poultry Farmers in Zambia: Implications for Surveillance and Antimicrobial Stewardship Programs -- Systematic Review and Meta-Analysis of Integrated Studies on Salmonella and Campylobacter Prevalence, Serovar, and Phenotyping and Genetic of Antimicrobial Resistance in the Middle East-A One Health Perspective -- Salmonella in Pig Farms and on Pig Meat in Suriname -- Multi-Drug Resistance to Salmonella spp. When Isolated from Raw Meat Products -- ESBL-Producing Escherichia coli Carrying CTX-M Genes Circulating among Livestock, Dogs, and Wild Mammals in Small-Scale Farms of Central Chile -- Poultry and Wild Birds as a Reservoir of CMY-2 Producing Escherichia coli: The First Large-Scale Study in Greece -- Vancomycin-Resistant Enterococci (VRE) in Nigeria: The First Systematic Review and Meta-Analysis -- Analysis of the Antibiotic Resistance Profiles in Methicillin-Sensitive S. aureus

Sommario/riassunto

Antibiotic resistance represents one of the most important challenges in the world and involves humans, animals and the environment. For this reason, it is increasingly important to focus our attention on the present scenarios and the future prospects relating to this problem. The One Health approach helps us and can provide the tools to consider the problem from different points of view, also providing alternative solutions to the use of the antibiotic itself.
