Disciplina	725.310944
Soggetti	Railroad stations - France
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction & Prefaces -- Research & Enquiry -- Strengthening French-Dutch expertises on Stations -- Research through Education: Amsterdam Sloterdijk.
Sommario/riassunto	At the main point of intersection between the railway and the city, stations are key elements in the organization of the intermodal transport as well as catalysts of urban developments in metropolises, medium and small cities. The focus of this publication is to explore the enrichment of a renewed approach of railway stations as intermodal nodes, therefore acting as breeding grounds for both urban and social developments. In this publication, invited experts from practice and knowledge institutes in France and the Netherlands share their common experience and draw on specific aspects and problems of conception, management and development of stations. A brief overview of the results of the two initiatives 'Stations of the Future' and the summer school 'Integrated Mobility Challenges in Future Metropolitan Areas' is here illustrated, accompanied by photo reportages of both events and by a curated reportage of the Amsterdam Sloterdijk station area".
