

1. Record Nr.	UNINA9910647298603321
Titolo	Cancer and the politics of care : inequalities and interventions in global perspective // edited by Linda Rae Bennett, Lenore Manderson, Belinda Spagnoletti
Pubbl/distr/stampa	London : , : UCL Press, , [2023] ©2023
Descrizione fisica	1 online resource (272 pages) : illustrations
Collana	Embodying inequalities
Disciplina	362.1
Soggetti	Medical policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"This timely volume responds to the epic impacts of cancer as a global phenomenon. Through the fine-grained lens of ethnography, the contributors present new thinking on how social, economic, race, gender and other structural inequalities intersect, compound and complicate health inequalities. Cancer experiences and impacts are explored across eleven countries: Argentina, Brazil, Denmark, France, Greece, India, Indonesia, Italy, Senegal, the United Kingdom and the United States. The volume engages with specific cancers from the point of primary prevention, to screening, diagnosis, treatment (or its absence), and end-of-life care. Cancer and the Politics of Care traverses new theoretical terrain through explicitly critiquing cancer interventions, their limitations and success, the politics that drive them, and their embeddedness in local cultures and value systems. It extends prior work on cancer, by incorporating the perspectives of patients and their families, 'at risk' groups and communities, health professionals, cancer advocates and educators, and patient navigators. The volume advances cross-cultural understandings of care, resisting simple dichotomies between caregiving and receiving, and reveals the fraught ethics of care that must be negotiated in resource-poor settings and stratified health systems. Its diversity and innovation ensures its wide

utility among those working in and studying medical anthropology,
social anthropology and other fields at the intersections of social
science, medicine and health equity." --
