Soggetti	Syria History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This volume provides a new means of interpreting and reconstructing the history of an important fortified site of the middle Euphrates valley, Qalat Jabar, and clarifies its connection with the neighboring regions. A detailed classification of the pottery finds from the late eleventh to the fourteenth centuries provides a chronological framework for the major changes in ceramic production - a valuable model which can be used for other sites.
