Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (279 pages)
Disciplina	179.1
Soggetti	Environmental policy Environmental management Sustainability Social sciences Economics Environmental Policy Environmental Management Society
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- 1.Environmental ethics -- 2.Environmental sustainability -- 3.Environmental decisions -- 4.Conclusions.
Sommario/riassunto	This book provides a summary of the main concepts involved in environmental ethics, sustainability and decisions and a consistent sequence of environmental ethics, sustainability and decisions. It presents many environmental ethics, by focusing on maximising welfare within teleological approaches and minimising inequalities within deontological approaches. It presents many sustainability paradigms, by focusing on weak sustainability to maximise welfare and strong sustainability to minimise inequalities. Two main decisions are presented by focusing on policies (taxes, standards, subsidies, permits, protected areas, exploitation rights) and projects (CBA) towards efficiency to maximise welfare and policies (national laws/regulations, bilateral/multilateral agreements) and projects (MCA) towards equity to

minimise inequalities.
