Transformations from the 1980s to the 2010s -- List of Contributors -- Index

Sommario/riassunto

During the Cold War, alternative globalization projects were underway: socialist Eastern Europe and left-leaning countries in the Third World maintained close economic relations. The two worlds traded and exchanged know-how and technology. This book examines the specific spaces of interaction of these exchanges and discusses the consequences for those projects of globalization undertaken in both world regions.
