Sommario/riassunto	Stone statues, indigenous to the early Turks, appeared in the vast territory of the Asian steppes, from Southern Siberia to Central Asia and across the foothills of the Ural Mountains. The custom originated among Cumans in Eastern Europe. The skill of erecting

anthropomorphic stelae required proficiency in processing different kinds of stone and wood, and was characterized by artistic value of representations, as well as by the timeless aesthetics of the canon. The author presents the results of her formative studies into the collection of the Cuman sculptures of the Veliko-Anadol Forest Museum, Ukraine. The book delves into the history of research on Cuman stone stelae, resulting in great reading for all archeologists and historians alike.

2. Record Nr.	UNINA9910298469503321

Sommario/riassunto

This book provides an up-to-date assessment of sustainable agri-food systems and rural development in the Mediterranean countries. It examines and reviews the impact of EU and national policies on environmental and trade issues in agricultural and rural organizations in the southern and eastern Mediterranean region. The book also reflects key socio-economic and political issues such as resource management, income distribution, employment and migration trends, and sustainability aspects. It demonstrates technical and methodological tools used for the analysis and explains their application. The book presents the collective work of a research consortium funded by an EU (FP7) project.
