Sommario/riassunto	In a refreshingly accessible style John Weiss presents a survey of industrialization in developing countries since 1945, as well as a study of the predominant theories of industrial growth in the Third World. This authoritative text analyzes:* the possibility of different paths to industrialization* the dominant neoclassical view and the challenges to this orthodoxy* the importance of small scale industry* the priority of technological change to industrialization.At a time when globalization is becoming an increasingly controversial phenomenon, this book

offers a powerful a
