

1. Record Nr.	UNINA9910669812503321
Autore	Maus Christian
Titolo	Assessing the impact of pesticides on pollinators // Christian Maus, Anne Alix, Daniel Schmehl
Pubbl/distr/stampa	Cambridge : , : Burleigh Dodds Science Publishing, , 2023
Descrizione fisica	1 online resource (42 pages)
Collana	Burleigh Dodds series in agricultural science
Disciplina	338.1
Soggetti	Pests - Control Sustainable agriculture Bee culture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This chapter provides an overview of the history of pollination biology, it begins by discussing the basics of pollination and goes on to discuss pollinators and their diversity. Sections also cover the ecology and evolution of floral traits, domestication and its impact on plant-pollinator relationships and how pollinators can impact agriculture. A section on modern agriculture and pollinators is also provided.
