Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Oxidation in animal products -- pt. 2. Oxidation in plant-based foods and beverages -- pt. 3. Antioxidant delivery in foods and beverages.
Sommario/riassunto	Oxidative rancidity is a major cause of food quality deterioration, leading to the formation of undesirable off-flavours as well as unhealthy compounds. Antioxidants are widely employed to inhibit oxidation, and with current consumer concerns about synthetic additives and natural antioxidants are of much interest. The two volumes of Oxidation in foods and beverages and antioxidant applications review food quality deterioration due to oxidation and methods for its control. The second volume reviews problems associated with oxidation and its management in different industry sectors. Part
