Sommario/riassunto	This Special Issue is aimed to offer an overview of studies presenting new rehabilitation approaches addressed to children with neurodevelopmental disorders, designed to enhance the effects of learning processes through the use of new technologies. The contributions of this Special Issue, authored by researchers and clinicians from some of the most valued Italian scientific institutions in the field of neurodevelopmental disorders, can offer some useful data and advice on the use of technology in rehabilitation and telerehabilitation to researchers, rehabilitators, clinicians and practitioners (psychologists, neuropsychologists, speech therapists, etc.).
