Sommario/riassunto

An Introduction to the Law and Economics of Environmental Policy emphasises the importance of institutional design in addressing social problems. Three important issues concerning institutional design are: policies, instruments, and enforcement. This volume surveys each of the issues, and emphasises the common themes arising in optimal institutional design. These themes include the cost of complex institutional design, and the role of private institutions attaining social objects. This book will be particularly useful to law schools, departments of government, policy or economics, environmental managers and insurance companies.

Sommario/riassunto	El Apologético de Espinosa Medrano es un testimonio tardío de la polémica gongorina, el único escrito en América por un defensor del poeta. Se trata de un tratado erudito de crítica literaria en el que un joven predicador y catedrático de Artes y Teología hace gala de su saber, su gracia y su estilo para defender al príncipe de los poetas de España contra los ataques vertidos por Manuel de Faria e Sousa, polígrafo portugués y defensor de Camões. Publicado en Lima en 1662, el libro es también una reivindicación criolla de Espinosa Medrano y de

su círculo, apoyada en un contexto imperial complejo. La presente edición crítica, acompañada de un estudio preliminar y de abundante anotación, ofrece una nueva lectura del tratado y de sus fuentes, integrándolo en el corpus de la polémica gongorina en el que su autor lo incluyó.
