Livello bibliografico	Monografia
Sommario/riassunto	Changes in working practices and conditions in the construction industry over the past decade have meant that competent authorities - health and safety committees, management or employers' and workers' organizations, in particular - may need to take a fresh look at such aspects as the safety of workplaces, health hazards, and construction equipment and machinery.; This code of practice takes account of new areas in the sector which require improved health and safety practices and other protective measures.
