| Sommario/riassunto | The practicalities of temporary works are an essential, cost-and-safety-critical aspect of all construction projects, but receive minimum |

coverage in training and remain poorly understood by many engineers. Covering all sub-specialties of this wide-ranging topic in a single resource, this book is invaluable for permanent works designers, engineers, technicians and contractors looking to minimise costs, maximise efficiency and ensure the safety of those working on-site.

Sommario/riassunto

This book investigates the unresolved issue of democratic legitimacy in contexts of pervasive disagreement and contributes to this debate by defending a relational version of political liberalism that rests on the ideal of co-authorship. According to this proposal, democratic legitimacy depends upon establishing appropriate interactions among citizens who ought to ascribe to one another the status of putative practical and epistemic authorities. To support this relational reading of political liberalism, the book proposes a revised account of the civic virtue of reasonableness along with an investigation of the epistemic-specific dimension of political equality. By engaging with political epistemology and social theory, this book explores ways to address inherent tensions within the liberal paradigm, using the following strategies of addressing these tensions: first, it defends a twofold model of legitimacy that distinguishes the goals, methodologies, and justificatory tasks of both ideal and nonideal phases of the two-level justificatory framework; second, it contends that democratic legitimacy requires an engaged and contextual critical appraisal of the injustices that characterize our daily social lives, illustrating how structural forms of injustice represent a profound betrayal of the liberal ideal of democratic legitimacy.

Sommario/riassunto

The studies of poverty, progress and development in this volume, first published in 1991, by a distinguished international roster of authors and researchers, aim to increase knowledge of the social mechanisms of pauperization, marginalization, and the exclusion of certain categories of society; to bring to light the potential and creative role of socio-cultural, intellectual, ethical, moral and spiritual values in progress and the development process; and to examine the links and contradictions between development and progress in order to propose ways of reducing social inequalities.
