ISBN	9783031198717 9783031198700
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (179 pages)
Collana	Contributions to Regional Science
Disciplina	910.01 910.019
Soggetti	Regional economics Space in economics Economic geography Well-being Quality of life Regional and Spatial Economics Economic Geography Well-Being Quality of Life Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter 1. Happiness Geography: Defining the field (Eric Vaz) -- Part I. Regional Challenges -- Chapter 2. A Spatial Analysis of the Instagram hashtag #happy: An assessment of Toronto (Eric Vaz) -- Chapter 3. The subjective well-being in North Africa and the impacts on agriculture and urban land (Azzeddine Bellout) -- Part II. Territorial Challenges -- Chapter 4. Researching quality of life in old age: some conceptual and methodological principles (Jose Sao Jose) -- Chapter 5. Peripheral retail expansion: social implications and spatial inequalities The case of the Île-de-France region (André Torre) -- Part III. Location Challenges -- Chapter 6. Sustainable Cities, Quality of Life and Mobility-Related Happiness (Karima Kourtiti) -- Chapter 7. Tourism, Climate Change and Wellbeing: The Products' Diversity as an Opportunity (Andre Samora-

Sommario/riassunto

This book offers readers a spatial understanding of happiness and subjective well-being. By integrating spatial and geostatistical methods, it sheds new light on the spatial and geographical aspects of subjective well-being. Geographical analysis allows us to measure spatial and regional discrepancies in subjective well-being and to identify heterogeneous profiles in terms of social, economic and environmental patterns. Consequently, the papers gathered here address various topics concerning the spatial aspects of subjective well-being, including social injustice, age, new urban spaces, and tourism. The book proposes a multidisciplinary approach and is intended for scholars and students in the fields of geography, economics and the spatial sciences. By examining several critical dimensions of happiness and subjective well-being, it enriches the complexity of regional decision-making on the path toward happier and more liveable societies.
