Titolo	Antioxidants in Age-Related Diseases and Anti-Aging Strategies / / Daniela-Saveta Popa [and three others]
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2022
Descrizione fisica	1 online resource (266 pages)
Disciplina	615.1
Soggetti	Clinical pharmacology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Aging is a complex, only partially understood process, and is a key risk factor in the development of noncommunicable ailments that greatly impact human quality of life. One of the causes of most age-related diseases is an imbalance in the oxidation-reduction reactions, with the accumulation of reactive species, which are major contributors to cellular senescence. The book contributes to the knowledge connected to the prevention or treatment of these pathological conditions. It focuses on the mechanisms by which oxidative stress and inflammatory factors could cause the genesis and progression of age-associated diseases, and on new strategies for delaying and altering aging.</p>

2. Record Nr.	UNINA9910702400303321
Autore	Choi Jai W
Titolo	Exercise and participation in sports among persons 20 years of age and over, United States, 1975 [[electronic resource] /] / [prepared by Jai W. Choi]
