

1. Record Nr.	UNINA9910674027703321
Titolo	Plasma-Catalysis for Environmental and Energy-Related Applications / / edited by Monica Magureanu, Corina Bradu
Pubbl/distr/stampa	Basel, Switzerland : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2022 ©2022
Descrizione fisica	1 online resource (94 pages)
Disciplina	571.64
Soggetti	Plasma cell diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Plasma catalysis has been a topic of research for many years due to its potential for applications in a wide range of chemical, environmental, and energy-related processes. Non-thermal plasma offers an unconventional way to initiate chemical reactions in gas and in liquid due to the energetic electrons generated in the plasma; however, it suffers from low selectivity. The coupling of plasma with catalysis can steer the reactions in the desired direction, thus ensuring improved selectivity towards the target products and reducing unwanted ones. Environmental applications of plasma catalysis have been focused on the removal of various air and water pollutants, while energy applications include hydrogen, syngas and ammonia production. This Special Issue demonstrates plasma catalysis as a solution to environmental problems caused by the greenhouses gases CO ₂ and CH ₄ , which can be converted to value-added products and fuels, air pollution with stable polycyclic aromatic hydrocarbons and volatile organic compounds, and water pollution with pharmaceutical products.

2. Record Nr.	UNINA9910743389103321
Autore	Hu Zhan-Chao
Titolo	Coupled heat and mass transfer in binary mixtures at supercritical pressures / / Zhan-Chao Hu
Pubbl/distr/stampa	Singapore : , : Springer, , [2022] ©2022
ISBN	981-16-7805-7 981-16-7806-5
Descrizione fisica	1 online resource (169 pages)
Collana	Springer theses
Disciplina	621.4022
Soggetti	Heat - Transmission Supercritical fluids
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Doctoral thesis accepted by Peking University, Beijing, P.R. China."
Nota di bibliografia	Includes bibliographical references and index.
