

1. Record Nr.	UNINA9910674352303321
Titolo	Sustainability Transformations, Social Transitions and Environmental Accountabilities // edited by Beth Edmondson
Pubbl/distr/stampa	Cham, Switzerland : , : Palgrave Macmillan, , [2023] ©2023
ISBN	9783031182686 9783031182679
Edizione	[First edition.]
Descrizione fisica	1 online resource (348 pages)
Collana	Palgrave Studies in Environmental Transformation, Transition and Accountability Series
Disciplina	304.2
Soggetti	Social change - Environmental aspects Sustainable development - Social aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Sustainability transformations, social transitions and environmental accountabilities: past and present entanglement -- 2. Evaluating Transformation Means Transforming Evaluation -- 3. Climate ethics in carbon footprints -- 4. Nature, Democracy, and Sustainable Urban Transformations -- 5. Sustainability transformations and environmental accountability -- 6. Accountable solar energy transitions in financially constrained contexts -- 7. Building socio-environmental resilience -- 8. Accountable environmental outcomes: collaborative governance and sustainability transformations -- 9. Environmental stewardship for sustainability transformations -- 10. Tackling the environmental and climate footprint of food systems: How “transformative” is the EU’s Farm to Fork Strategy? - 11. Just Transitions in the Context of Urgent Climate Action -- 12. Sustainability transformations, social transitions and environmental accountabilities: emerging opportunities.
Sommario/riassunto	This book draws upon diverse approaches and understandings of sustainability transformations, social transitions and environmental accountabilities. It presents case studies that highlight real-world consequences of changing ideas about how best to achieve effective and durable sustainability transformations and examines how environmental accountabilities and social transitions influence

sustainability transformations. Each chapter provides insights regarding how new knowledge and perspectives matter for whether, when, and how people, governments, corporations and international organisations seek and pursue solutions to social-ecological challenges and sustainability dilemmas. It pays sustained attention to whether and how understandings and applications of accountability can improve international sustainability transformations. The chapters presented in this book consider some pressing questions concerning social transitions and environmental accountabilities: how can they contribute to sustainability transformations, how do they influence the scalability of sustainability transformations, and, how can such sustainability transformations become durable? Beth Edmondson is an independent researcher based in Australia. Her work focuses on international responses to global climate change, the possibilities for order in the international political system, the nature of sovereignty and the scope of international law in constructing governmental capacities.
