1. Record Nr.	UNINA9910254880403321
Autore	Baglioni Angelo
Titolo	The European Banking Union : A Critical Assessment / / by Angelo Baglioni
Pubbl/distr/stampa	London : , : Palgrave Macmillan UK : , : Imprint : Palgrave Macmillan, , 2016
ISBN	9781137563149 1137563141
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (XIII, 136 p. 8 illus.)
Collana	Palgrave Macmillan Studies in Banking and Financial Institutions, , 2523-3378
Disciplina	332.1
Soggetti	Financial services industry Capital market Financial Services Capital Markets
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Why did European policy-makers introduce the Banking Union? Which are its main features? How does it affect banks and their customers? This book tries to answer these questions, by providing a clear description of the building blocks of the Banking Union, and by showing that several issues remain unanswered. The Banking Union is a major step towards a more integrated Europe, thanks to the centralization of the banking supervision. However, it is far from being completed. The author discusses some controversial issues, that still need to be addressed at the policy level, among which are: the cross-country pooling of resources to manage the banking crises, the way to introduce a common deposit insurance scheme, the application of the bail-in rule to the retail bank customers, the methodology to carry out the stress tests on banks, and the attribution of the macro-prudential supervision. .

	Sommario/riassunto	The 7-volume set of LNCS 13841-13847 constitutes the proceedings of the 16th Asian Conference on Computer Vision, ACCV 2022, held in Macao, China, December 2022. The total of 277 contributions included in the proceedings set was carefully reviewed and selected from 836 submissions during two rounds of reviewing and improvement. The papers focus on the following topics: Part I: 3D computer vision; optimization methods; Part II: applications of computer vision, vision

for X; computational photography, sensing, and display; Part III: low-level vision, image processing; Part IV: face and gesture; pose and action; video analysis and event recognition; vision and language; biometrics; Part V: recognition: feature detection, indexing, matching, and shape representation; datasets and performance analysis; Part VI: biomedical image analysis; deep learning for computer vision; Part VII: generative models for computer vision; segmentation and grouping; motion and tracking; document image analysis; big data, large scale methods.
