Sommario/riassunto	On the basis of systematically summarizing and sorting out the significant achievements made since China's rural reform, this book comprehensively explains the theoretical basis, principles and strategies of the road to rural revitalization of socialism with Chinese characteristics. Through in-depth research on nine aspects of rural basic management system, rural deepening reform, food security, modernization of agriculture and rural areas, integrated development of urban and rural areas, poverty alleviation, new rural construction, ecological civilization construction and rural governance, this book puts forward the development direction and strategic choice of China's

rural revitalization by the middle of this century. It not only enriches and develops the theory of development economics, but also provides experiences for rural development in developing countries.
