1. Record Nr.	UNINA9910674358403321
Autore	Gelbukh Alexander <1962->
Titolo	Computational Linguistics and Intelligent Text Processing : 19th International Conference, CICLing 2018, Hanoi, Vietnam, March 18–24, 2018, Revised Selected Papers, Part I / / edited by Alexander Gelbukh
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2023
ISBN	9783031237935 3031237935
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (441 pages)
Collana	Lecture Notes in Computer Science, , 1611-3349 ; ; 13396
Disciplina	410.285
Soggetti	Computational linguistics Machine learning Natural language processing (Computer science) Coding theory Information theory Database management Application software Computational Linguistics Machine Learning Natural Language Processing (NLP) Coding and Information Theory Database Management Computer and Information Systems Applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Author profiling and authorship attribution, social network analysis -- Information retrieval, information extraction -- Lexical resources -- Best Paper Award, Third Place -- Machine translation -- Morphology, Syntax -- Best Paper Award, Second Place -- Semantics and text similarity -- Sentiment analysis -- Syntax and parsing -- Text categorization and clustering -- Best Paper Award, First Place -- Text generation -- Text mining.

Sommario/riassunto   The two-volume set LNCS 13396 and 13397 constitutes revised
                        selected papers from the CICLing 2018 conference which took place in
                        Hanoi, Vietnam, in March 2018. The total of 68 papers presented in the
                        two volumes was carefully reviewed and selected from 181
                        submissions. The focus of the conference was on following topics such
                        as computational linguistics and intelligent text and speech processing
                        and others. The papers are organized in the following topical sections:
                        General, Author profiling and authorship attribution, social network
                        analysis, Information retrieval, information extraction, Lexical
                        resources, Machine translation, Morphology, syntax, Semantics and text
                        similarity, Sentiment analysis, Syntax and parsing, Text categorization
                        and clustering, Text generation, and Text mining.
