

1. Record Nr.	UNINA9910674373203321
Autore	Kayser Veysel
Titolo	Monoclonal Antibody-Directed Therapy // Veysel Kayser, Amita Datta-Mannan
Pubbl/distr/stampa	Basel, Switzerland : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2022
Descrizione fisica	1 online resource (142 pages)
Disciplina	338.476151
Soggetti	Pharmaceutical industry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The book deals with therapeutic monoclonal antibodies (mAbs) broadly, and relevant topics such as challenges and opportunities, next-generation antibody products, Antibody-Drug-Conjugates (ADC), bispecifics, glycosylation, and T-cell engagers are covered. Each topic has been written by leading groups around the world and the book should be of interest to researchers from both academia and industry.
