

1. Record Nr.	UNINA9910674388703321
Titolo	Fungal Endophytes in Plants // edited by Gary A. Strobel
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2018 ©2018
Descrizione fisica	1 online resource (vii, 242 pages) : illustrations
Disciplina	581.70913
Soggetti	Endophytes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Gary Strobel -- Tyler Maxwell, Richard G. Blair, Yuemin Wang, Andrew H. Kettring, Sean D. Moore, Matthew Rex and James K. Harper -- Jo "el E. T. Ateba, Rufin M. K. Toghueo, Angelbert F. Awantu, Brice M. Mba'ning, Sebastian Gohlke, Dinkar Sahal, Edson Rodrigues-Filho, Etienne Tsamo, Fabrice F. Boyom, Norbert Sewald and Bruno N. Lenta -- Yuemin Wang and James K. Harper -- Dong-Hui Yan, Xiaoyu Song, Hongchang Li, Tushou Luo, Guiming Dou and Gary Strobel -- Yu-Ling Huang, Naupaka B. Zimmerman and A. Elizabeth Arnold -- Andreea Cosoveanu, Samuel Rodriguez Sabina and Raimundo Cabrera -- Sunil K. Deshmukh, Manish K. Gupta, Ved Prakash and M. Sudhakar Reddy -- Sunil K. Deshmukh, Manish K. Gupta, Ved Prakash and Sanjai Saxena -- Andreea Cosoveanu and Raimundo Cabrera -- Eyob Chukalo Chutulo and Raju Krishna Chalannavar -- Brian R. Murphy, Fiona M. Doohan and Trevor R. Hodgkinson -- Gary Strobel.
Sommario/riassunto	This Special Issue is dedicated to fungi that are found as endophytes in the world's plants. Among many other things, it covers newly-discovered fungi that are endophytic. The role of the endophyte in the plant microbiome is of emerging interest, and aspects of are included. Secondary products of endophytes are receiving renewed attention as some have been found that are potential fuels, antibiotics, antioxidants, and anticancer agents, as well as immunosuppressive compounds. Aspects concerning the physiological/biochemical/role of the endophyte, as it relates to its host are also of interest. It goes

without saying that this volume also includes aspects of the genetics and epigenetics of endophytes, especially as they relate to the host genome or the production of valuable and important products.
