

1.	Record Nr.	UNICAMPANIASUN0006151
	Autore	Ricci, Aldo G.
	Titolo	Aspettando la repubblica : i governi della transizione 1943-1946 / Aldo G. Ricci
	Pubbl/distr/stampa	Roma : Donzelli, [1996]
	ISBN	88-7989-228-2
	Descrizione fisica	XIV, 241 p. ; 22 cm.
	Disciplina	945.0916
	Soggetti	Italia - Governo - 1943-1946
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910674398203321
	Titolo	Animal Nutrition and Welfare in Sustainable Production Systems / / edited by Nikola Puvaca, Vincenzo Tufarelli, Eva Voslarova
	Pubbl/distr/stampa	Basel, Switzerland : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2022
	Descrizione fisica	1 online resource (ix,121 pages) : illustrations
	Collana	Sustainability (MDPI series)
	Disciplina	641.306
	Soggetti	Food of animal origin Meat industry and trade Sustainability
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

"Today, food animal production systems demand high energy, land, chemicals, and water--all of which are increasingly becoming scarce. Thus, change and innovation are required in many animal production systems to meet the present and future demands for animal products sustainably. Over the last four decades, inexpensive grain, energy, and protein have enabled the economic development of intensive meat, eggs, and milk production systems based on feeding grains and other ingredients sourced from far-off places. The poultry and pig intensive production systems have become highly capital intensive, and they have resulted in many environmental challenges. Food animal feed, nutrition, and welfare are the foundation of successful animal systems. They directly or indirectly affect the entire animal production sector, associated services, public goods, and services, including animal productivity, health and welfare, product quality and safety, land use and land-use change, and greenhouse gas emissions. The sustainability of food animal nutrition and welfare is crucial in developing animal production across production systems. The sustainable increase in animal productivity, which is key to meeting the large current and future demands for animal origin products, cannot be achieved without sustainable animal nutrition and welfare."
