Sommario/riassunto	In the event of a paediatric cardiac arrest, it is essential to be able to respond rapidly, providing safe and effective care. The second edition of this successful text provides nurses with a practical and systematic guide to the rapid assessment and delivery of appropriate resuscitation

to infants and children. Conforms to current European Resuscitation Council Guidelines. Based on up-to-date research and evidence-based practice protocols. Synoptic approach enables rapid delivery of effective treatment. Written by experts in the field of both resuscitation and paediatrics.
