

1. Record Nr.	UNINA9910677320703321
Titolo	Membrane reactor engineering : applications for a greener process industry // edited by Angelo Basile [and three others]
Pubbl/distr/stampa	Chichester, England : , : Wiley, , 2016 ©2016
ISBN	1-118-90682-9 1-118-90681-0 1-118-90684-5
Descrizione fisica	1 online resource (473 p.)
Disciplina	660/.2832
Soggetti	Membrane reactors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Title Page; Table of Contents; Preface; Contributors; Part 1: Fundamental Studies on Membrane Reactor Engineering; 1 Membrane Reactors: The Technology State-of-the-Art and Future Perspectives; 1.1 Selective Membranes: State-of-the-Art; 1.2 Membrane Reactors Technology: State-of-the-Art; 1.3 Main Barriers to Moving into the Commercialization Phase; 1.4 Conclusions and Future Perspectives; Nomenclature; List of acronyms; Acknowledgments; References; 2 Criteria for a Palladium Membrane Reactor or Separator Design II: Concentration Polarization Effects; 2.1 Introduction 2.2 Concentration Polarization 2.3 Mass Transfer Effects; 2.4 Separator; 2.5 Reactor: Methane Steam Reforming (MSR); 2.6 Concluding Remarks; Acknowledgment; References; 3 Structured Catalysts and Support for Membrane Reactors; 3.1 Introduction; 3.2 Structured Catalysts; 3.3 Membranes; 3.4 Applications; 3.5 Conclusions; Nomenclature; References; 4 Elements of Reactor Design and Development of Process Schemes for Membrane Reactors; 4.1 Introduction; 4.2 Membrane Reactor Concept and Configurations; 4.3 Membrane Reactor Design Criteria; 4.4 Discussion; 4.5 Conclusions; Nomenclature; Greek Symbols References 5 Ceramic Membranes with Mixed Ionic and Electronic Conductivity: Oxygen and Hydrogen Transporting Membranes -

Synthesis, Characterization, Applications; 5.1 Introduction; 5.2 Oxygen Ions-Electrons Mixed Conducting Membranes, Latest Material Developments; 5.3 Proton-Electron Mixed Conducting Materials, Latest Material Developments; 5.4 Applications - Laboratory Scale; 5.5 Applications - Pilot Scale; 5.6 Conclusions; Acknowledgement; References; 6 Polymeric Membrane Reactors; 6.1 Introduction; 6.2 General Considerations on Polymeric Membrane Selection for Membrane Reactors  
6.3 Principles of Polymeric Membrane Preparation  
6.4 Polymeric Membrane Modification; 6.5 Application of Polymeric MRs; 6.6 Conclusion and Future Trends; Acronyms; References; 7 Ceramic Membrane Reactors: Theory and Applications; 7.1 Introduction; 7.2 Principles of Ceramic MRs; 7.3 Conclusion and Future Trends; Acronyms; References; Part 2: Applications; 8 Membrane Reactors for Hydrocarbon Dehydrogenation; 8.1 Introduction; 8.2 Propylene Market and Production Maximization; 8.3 Propane Dehydrogenation; 8.4 Membrane-Based PDH; 8.5 Conclusions; List of Acronyms; Acknowledgment; References  
9 Pd-Based Membrane Reactors for Syngas Preparation and WGS  
9.1 Introduction to Steam Reforming Technology; 9.2 Reformer and Membrane Module (RMM) Architecture for Syngas Production; 9.3 Reaction and Membrane Module (RMM) Architecture for Water Gas Shift Application (WGSR); 9.4 Conclusions; Nomenclature; References; 10 Membrane Reactors Powered by Solar Energy; 10.1 Introduction; 10.2 Process Description; 10.3 Process Analysis; 10.4 Conclusions; Acknowledgments; Acronyms; Symbols; References; 11 Molten Salt Solar Steam Reforming: Process Schemes Analysis; 11.1 Introduction  
11.2 Pilot Plant and Reactor Arrangement
